

LungCANet Analysis Report

Explainable AI assessment of a lung CT image

Predicted Class	Confidence	Review Status
Normal	100.00%	High Confidence

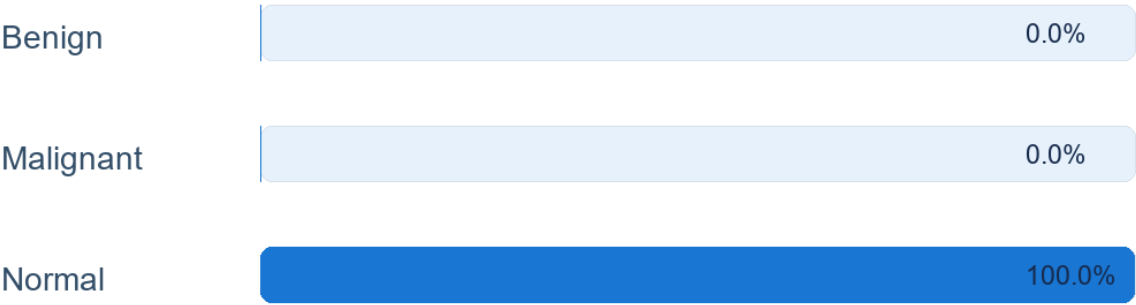

Case & Analysis Information

Report ID	LCN-20261009-150100-180
Case ID	5458
Patient initials	tis
Age / Sex	23 / Male
Scan date	9.08.2026
Referring center	DMC
Reviewer	no
Generated	2026-10-09 15:01:00
Input image	n.jpg
Model	lungcanet.keras
Preprocessing	CLAHE + Gamma + normalization + resize to 224 x 224
Grad-CAM layer	conv2d_210

Class Probabilities

Class	Probability	Level
Benign	0.00%	Low
Malignant	0.00%	Low
Normal	100.00%	High
